THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. Besides the Construction Enterprises, which deal only with the erection or construction of building projects, the Ministry of Construction also controls another quasi-independent organization called Intreprinderile de Instalatii (Installation Enterprises), which handles the installation of electrical and mechanical equipment, wiring and other facilities. Because of their related functions, the Construction Enterprises and the Installation Enterprises, though distinctly separate and independent organizations, cooperate rather closely in all their building activities.
2. The section of the Ministry of Constructions which controls the Installation Enterprises is headed by N. Nistor. The technical directors are two engineers, Dulbert and M. Leon Brill.
3. There follows a partial list of Installation Enterprises which are currently operating in Rumania:
  - a. Intreprinderea de Instalatii No. 3 (Izolatii - Separate), located at 5-9 Strada Banu Vacarescu in Bucharest, performs all the insulation jobs required in building projects. They install various types of equipment such as weatherproofing, sound-proofing, insulation of heating equipment, and water and sewage pipes.
  - b. Intreprinderea de Instalatii No. 18, located at 48 Strada Fabrica de Chibrituri, operates a well equipped plant which manufactures electrical equipment, elevators, coils and other apparatus. The plant consists of four principal buildings. The main offices, however, are located at

5-7 Strada 13 Decembrie in Bucharest. The first building houses the workshop which manufactures the electrical equipment, a tool room, a cafeteria for workers, a workshop which makes coils, and offices. The second building houses a marble workshop, a plant for the manufacture and repair of elevators, a materials depot, toilets and offices. The third building serves principally as a repair shop and is divided into a carpentry section, and auto repair section, and an elevator repair section. The fourth building contains a foundry, a blacksmith shop, storage and warehouse space. There is additional warehouse space in the second building and in the basement of the first building. In the yard of the plant there are three furnaces for the working of brass, aluminum and iron.

- c. Intreprinderea de Instalatii No. 19, located at 41-43 Calea 13 Septembrie in Bucharest, manufactures and installs central heating units. Its activities are closely interwoven with those of Ferometal, a business firm which distributes, and assists in the installation of electrical heating equipment which Intreprinderea de Instalatii No. 19 manufactures. Many of their workshops and storage facilities are used in common. The shops and warehouses are housed in six one-story buildings and include such facilities as: a warehouse used principally by Ferometal for the storage of building and sanitary supplies; a building which contains a metal workshop equipped with two large lathes, two polishers and a furnace, and storage space for cement and lime owned by Ferometal; a warehouse used jointly by Ferometal and the Installation Enterprises No. 19 for the storage of sanitary equipment; an undeveloped lot used for open storage of pipes of various dimensions; a storage area for dynamite; technical offices; a building housing the Ferometal offices and storage facilities for electrical equipment, as well as a workshop equipped with ten lathes which are operated by Installation Enterprises No. 19 workers; and a building which houses laboratories, a cafeteria for workers, a tool room, a blacksmith shop, an auto repair shop and a garage. Attached hereto is a rough sketch showing the above-mentioned building lay-out (Attachment A).
- d. Intreprinderea de Instalatii No. 21, located in Bucharest, has several sub-offices throughout the city which are concerned principally with water supply and sewage disposal installations.
